Fall Arrest System

The Bucket Shop "Fall Arrest System"

Recently a manufacturing agreement between Andy Moreau (Inventor of the "Fall Arrest System") and United Supply has been completed so that construction can begin on this new and timely Safety Device.

A new Government Legislation recently passed requires that some form of a "Fall Arrest System" must secure all individuals involved in the tarping or chaining of loads while on top of the load.

Introducing the latest in Fall Arrest Technology, "The Fall Arrest System" from The Bucket Shop.

Through extensive testing and certification by an Engineer, the unit has an X4 Safety Factor built in. All welding involved on the unit is by a Canadian Welding Bureau Certified Shop, and CWB Certified Welders.

Fall Arrest System Features

- Unit can be either mounted permanently on cement pillars or can be made portable through the aid of fitted solid castors or foam filled pneumatics for rough terrain.
- Unit arrives 100% ready to erect and includes all hardware and steel members (which are all approved Grades and sizes) bolts, 5 point trolley, castors of choice, retractable tether etc.
- The units are primed and painted Safety Yellow and all ladder rungs and platforms are covered with anti-slip coatings.
- Every unit arrives with detailed instructions and will take approximately 4 to 6 hours for two men to assemble. The complete unit weighs approximately 3200 lbs and additional equipment required to assemble includes a boom truck and a forklift.
- The units come with a full year warranty on all parts and labour and replacement parts are available upon request.
- Units are to be manufactured upon order receipt. Purchase orders from interested parties, is required on company letterhead showing correct mailing address and drop points. All shipping will be done FOB Timmins and unit can be crated for overseas shipping. Delivery time frame is in the area of 2-3 weeks.

Unit arrives 100% ready to erect and includes all hardware and steel members (which are all approved Grades and sizes) bolts, 5 point trolley, castors of choice, retractable tether etc.

The Bucket Shop and Steeltec can also provide an experienced technician to assist in assembling the Fall Arrest System.

For further information on the unit or quotation in regards to onsite installation, please contact Paul Woodward directly at (705) 360-4355 or 1-800-461-9823. Paul can also be reached through e-mail at <buckets@nt.net>
