

The Bucket Shop

Mining Wear Parts

The Bucket Shop utilizes only Hensley's mining wear parts that are defined by the same exacting fit, long wear, and intelligent design inherent in our construction wear parts. We also carry construction and attachment product lines. We specialize in providing excellent service in dealing with all earth moving applications.

Mining Product Line

Hensley mining wear parts include the proprietary Parabolic brand of teeth and adapters as well as complete lip systems for loaders (Blade Saver II), shovels, and LHD trams.

Hensley has recently introduced a completely new concept in lip systems: the patented J-Bolt Edge System for LHD Scoop Trams and Loaders. This J-Bolt System will allow you to perform a lip change-out in a matter of minutes, using only a wrench. Ask The Bucket Shop for details on the following O.E.M. replacement products manufactured by Hensley.

Replacements For:

- Amsco style teeth, lip shrouds, vertical edges, shackles, and corner heel bands
- Bobors style teeth, adapters, and shrouds
- Bucyrus-Erie style teeth, adapters, shrouds, trunnions, clevises, rope sockets, links, spreader bars, bushings, heel bands, and more
